

Wall Searching Metal Locator

DATA SHEET

This high-performance wall, wood and cloth searching metal detector from C.Scope International Limited is perfectly designed to meet the exacting standards required by the building, construction, timber reclamation and clothing industries.

Typical applications in the construction industries include the precise location of metal pipes and cables prior to drilling in walls and ceilings, pinpointing cavity wall ties and marking the position of steel reinforcing rods in concrete.

For the timber reclamation industry, the C.Scope handheld Metal Locator can quickly and effectively detect nails and screws embedded in reclaimed timber whilst for the textile industry it is the solution for finding small metal objects such as pins or staples concealed in finished items.

The Metal Locators twin search coil technology provides high sensitivity to a wide range of metal objects with negligible interference from damp walls or dense covering materials.

Those search coils are securely set in styrene-based resin making them far more resistant to impact damage when compared to the ferrite rods and flimsy coil construction used in other types of metal detector. Its casing is constructed from high impact ABS adding further still to the robustness and reliability of the Detector.

This lightweight metal detector has a simple, single control operation making it both quick and easy to operate, with the added advantage of having a headphone socket to allow the use of headphones in particularly noisy environments.

Conveniently powered by a single PP3 (6LR61) alkaline or NiMH rechargeable battery, the C.Scope Wall Searching Metal Locator is a must-have tool for anyone needing to detect metal pipes and cables in walls, reinforcing rods in concrete, old nails and other metalwork in reclaimed timber or needles and pins in fabrics.

- High sensitivity, high performance twin coil induction balance handheld metal detector
- Audio and Visual indication of detected metal objects
- Simple, single control operation
- Lightweight and comfortable to hold and operate
- High impact ABS construction
- Suitable for use with earphones
- Powered by one battery with a low battery indicator. Long battery life.
- Operating temperature -9°C to +54°C (16°F to 129°F)

Product name	WALL SEARCHING METAL LOCATOR
Part no.	HHB C
Detection Range Guide	<ul style="list-style-type: none">- 13 amp power cable up to 13 cm (5 in)- 15 mm copper pipe up to 18 cm (7 in)- Steel reinforcing bar up to 15 cm (6 in)<ul style="list-style-type: none">- Cavity wall tie up to 15 cm (6 in)- 30 mm iron nail up to 13 cm (5 in)- 25 mm sewing pin up to 10 cm (4 in)
Dimensions	9 cm x 28 cm x 3.2 cm (3.5 inches x 11 inches x 1.3 inches)
Weight	370 g (13 oz)
Warranty	3 Years
Battery	1 x PP3 (IEC type 6LR61)
